

Exercise 2

Listen to the dialogue and complete the following sentences.

Fill in the blanks

S : Ms. Smith, a 55-year-old housewife

G : Dr. Gregory, a doctor

At a hospital

G : Good evening Ms. Smith. I'm Dr. Gregory. _____ you here today?

S : My daughter just gave birth to a baby girl the day before yesterday.

G : Congratulations! That's great news.

S : Thank you. Although I'm happy to have a granddaughter, I'm also worried because she has a _____. What should I do?

G : Can you tell me a little more? How severe is it?

S : She has a cleft on the left side of her lip. It's about two centimeters long. Do you think I should take her to the university hospital right away?

G : Cleft lip is a _____ of the upper lip that occurs about once in 1000 births. The clefts vary from a small notch in the transitional zone to ones that extend through the lip into the nose. If you are worried about it, please bring the baby with your daughter tomorrow.

S : I will bring them tomorrow.

Translate the doctor's statement into English.
